

18CA314-Cryptography and Network Security

ASSIGNMENT-1

2. Find the multiplicative inverse of all the elements in Z_5 and Z_{11}

Ans: Multiplicative Inverse of:

Z_5 ->

a	1	2	3	4
a^{-1}	1	3	2	4

Z_{11} ->

a	1	2	3	4	5	6	7	8	9	10
a^{-1}	1	6	4	3	9	2	8	7	5	10

3. Determine the gcd of 56245 and 43159

Ans: $56245 = 43159 * 1 + 13086$

$43159 = 13086 * 3 + 3901$

$13086 = 3901 * 3 + 1383$

$3901 = 1383 * 2 + 1135$

$1383 = 1135 * 1 + 248$

$1135 = 248 * 4 + 143$

$248 = 143 * 1 + 105$

$143 = 105 * 1 + 38$

$105 = 38 * 2 + 29$

$38 = 29 * 1 + 9$

$29 = 9 * 3 + 2$

$9 = 2 * 4 + 1$

$2 = \underline{1} * 2 + 0$

Therefore, $\gcd(56245, 43159) = 1$.

4. Compute $\phi(n)$ for 3^4 and 2^{10}

Ans: According to Euler's product formula

$$\phi(3^4) = 3^4 * (1 - (1/3))$$

$$= 81 * 2/3$$

$$= \underline{54}.$$

$$\phi(2^{10}) = 2^{10} * (1 - (1/2))$$

$$= 1024 * 1/2$$

$$= \underline{512}.$$

5. Compute $3^{100} \bmod(31319)$

Ans: Here $e=100 \Rightarrow 2^6 + 2^5 + 2^2$

$$3^0 \bmod 31319 = 3$$

$$3^2 \bmod 31319 = 9$$

$$3^4 \bmod 31319 = 81$$

$$3^8 \bmod 31319 = 6561$$

$$3^{16} \bmod 31319 = 14418$$

$$3^{32} \bmod 31319 = 21979$$

$$3^{64} \bmod 31319 = 12185$$

$$3^{100} \bmod(31319) = 12185 * 21979 * 81 \bmod 31319$$

$$= 5346 * 81 \bmod 31319$$

$$= \underline{25879}.$$
